EXPERIENCE

Dezine Lyric

July 2025 – Present

Full Stack Developer

Pune, India

- Architected commercial production web deployments including zconstructllc.com, designlyric.com, chandanadixit.com, bhumiusa.com, and enterprise platforms on Wix Studio.
- Architected end-to-end web applications, reducing deployment cycles by 20% through CI/CD optimization.
- Maintaining high-traffic platforms with 98.5% uptime by implementing robust security protocols and load balancing.
- Engineering scalable React-based front-ends and Node.js back-ends.
- Streamlined database architecture and SQL queries, resulting in a 25% improvement in average page load speeds.

Independent Freelance Developer & Analyst

Sept. 2025 – May 2026

Full Stack Engineer & Technical Consultant

Remote

- Secure Password Manager (C#):** Engineered an object-oriented console application using custom substitution ciphers to encrypt text-based credentials; built a secure data persistence pipeline with text storage files and integrated an automated strength checker.
- UK E-Sports League Platform (Full-Stack):** Developed a dynamic, mobile-responsive web application using Bootstrap and MySQL; implemented client/server-side validation and built a secure administrative authentication system.
- MicroCRUD Framework Deployment (Vanilla PHP/MySQL):** Configured and deployed a lightweight framework to production; engineered optimized partial-match search logic and dynamic database filtering to benchmark native efficiency.
- Corporate Valuation Engine:** Formulated professional financial modeling frameworks to project enterprise values; constructed multi-variable sensitivity scripts calculating WACC, CAPM, FCFF, and FCFE under uncertainty constraints.

Lera Robotics

Feb. 2025 – May 2025

Web & Game Developer

Pune, India

- Optimized WordPress maintenance workflows, reducing content update turnaround time by 30%.
- Translated Figma wireframes into high-fidelity UI components, improving mobile responsiveness scores by 15%.
- Refined C/C++ codebases through rigorous debugging, ensuring 100% compliance with strict VR performance metrics.

Jnana Prabodhini

June 2024 – Dec. 2024

Web Developer & Game Developer

Pune, India

- Authored complex AI behaviors and gameplay mechanics in JavaScript, increasing average session duration by 10%.
- Executed iterative updates based on beta tester feedback, resolving 50+ critical bugs prior to final release.
- Ensured seamless hardware-software integration for VR lab setups, facilitating 10+ weekly training sessions.

FIELD EXPERIENCE

Technical Facilitation & Workshops

2024 – 2025

Technical Facilitator

Various Locations

- Orchestrated AR/VR Lab installations at Nigdi Science Park, impacting 200+ students through hands-on learning.
- Conducted 5+ specialized IoT and VR workshops across Pune and Poonch, achieving 90%+ positive attendee feedback.

PROJECTS

Self-Learning Adaptive Filter for Hearing Aids

2024 – 2025

- Built an AI-driven audio filter using Q-Learning that reduced ambient noise interference by 40% in real-time.
- Deployed efficient signal processing algorithms optimized for low-power hardware constraints.

Virtual Kiosk Website

2024

- Launched an immersive 360-degree virtual tour platform, garnering over 1,000 unique digital campus visits.
- Live: jnanaprabodhini.org/virtualkiosk/

Ultrasonic Glasses & Object Detection

2024

- Integrated MediaPipe object classification with ultrasonic sensors to provide haptic feedback with 95% accuracy.

EDUCATION

MIT World Peace University

Bachelor of Technology (CGPA: 7.77)

2021 – 2025

Pune, India

- Relevant Certifications: Cognizant AI, JP Morgan Software Engineering, and Deep Learning Mastery.

SKILLS

Languages : React, Node.js, JavaScript, C#, Python, C, C++, PHP, HTML, CSS, SQL, MySQL

Tools : Wix Studio, Figma, Canva, WordPress, MATLAB, Adobe Illustrator, MediaPipe, Git, CI/CD

Soft Skills : Project Management, Leadership, Critical Thinking, Team Collaboration
